Annual Report for 2024/2025

2025 so far is a hard year for Hong Kong as we have faced a sluggish economic environment. The economic situation in the society seems to have a long way track in its recovery. We have to work together actively for exploring more chances for Hong Kong and the industry. The Board of Directors (BoD) held five (5) numbers of meetings in this term and I am pleased to report the key activities as follows:

1. Membership

As of August 2025, our membership has total 144 members including 61 Life Members (13 Fellow & 48 Member), 3 Life Corporation Members, 13 Corporate Members, 3 Fellow Members and 64 Ordinary Members. We did have a steady growth of our member number in the past few years .

2. Technical Visits and Exhibition

- The Association joined the AEE HKC's Technical Visit to Macau MGM Cotai and Macau Seac Pai Van Water Treatment Plant on 22 March 2024
- The Association joined the Technical Visit to China CR Expo 2025 in Shanghai from 26 to 29 April 2025
- The Association participated in Build4Asia Exhibition 2025 held from 14 to 17 July 2025. The Association set up a booth together with the HKIE Gas & Energy Division exhibitions to promote the Association to others

3. Training & Education

The Association was successfully organized a training course on Leadership in Energy and Environmental Design (LEED) on 20 and 21 January 2025. With its high popularity, another LEED training course would be organized on 25 and 26 September 2025. In the shortcoming future, the Association intended to organize more training courses regularly and another Energy Efficiency Performance Measurement and Verification Analyst (PVMA) training and certification course would be organized in 2026.

4. Participation in related Government Committees and Energy Events

The Association has been actively contributing our views and inputs on various energy-related policies/affairs to different Bureaus or Departments of HKSAR, I was invited to join the following activities on behalf of the Association.

- Stakeholder Engagement Workshop of the formulation of Building Energy Efficiency Labelling System in Hong Kong
- EMSD's Discussion Forum on Buildings Energy Saving in Hong Kong
- The Judging Panel of CLP Smart Energy Award 2025

5. Liaison in the Industry

As the same in the past, the Association has been keeping close liaisons with other partnering institutions and associations in the industry by supporting and attending their events. The Association would continue to explore more opportunities in organizing various joint events such as technical visit, training courses and other activities.

6. Concluding Remark

It is really my great honour to be the President of HKAEE for the term from 2024 to 2026. I would like to give my sincere thanks to all the Honorary Advisors, Past Presidents, Chairman, the BoDs and members for their excellent input and active participation. I am sure under the collaboration of the Office-bearers & Board of Directors, we will keep our momentum in delivering our contributions in the industry whenever required in the energy aspects and overcoming the various challenges ahead. Thank you.

Glorisun Wong
President (2024 – 2026)
