Abstract : Oil Free Chiller & Hartman Loop Control System
Oil-free Chiller and Hartman Loop Control System can fulfill the objectives of reducing greenhouse gas emissions via energy reduction to achieve sustainable environment. The talk will present a new type of chiller and explain the features and benefits which enable building Owners and design professionals to achieve energy efficiency and reducing maintenance and operation costs in modern air-conditioning systems without undermining performance reliability and comfort cooling. A new approach on control systems that complimenting the oil-free chillers to optimize chiller plant efficiency will also be introduced.
