

Technical Visit to the Hong Kong Organic Waste Recycling Centre 21 May 2016 (Saturday)

The Energy Institute Hong Kong and the Hong Kong Association of Energy Engineers are jointly organizing a technical visit to the **Hong Kong Organic Waste Recycling Centre** in Sheung Shui on Saturday, 21 May 2016. This visit aims to learn the whole process of food waste management: from transforming food waste to organic fertilizer that can be used in hydroponic farming and mushroom propagation, which are the new farming methods that have become increasingly popular in urban farming; as well as the innovative process of turning food waste to biogas gas and nutrient rich solid residues which can be further processed into fish feed.. Solar System with various types of photovoltaic panels is adopted to generate electricity in the Recycling Centre.

EI members and HKAEE members and their guests are cordially invited to join the visit with details as below.

Date: 21 May 2016 (Saturday) **Time:** 0900 to 1215
